WE'RE REVOLUTIONISING BROADBAND

We're building a brand new network from scratch, using the latest full fibre technology. The UK's broadband infrastructure is not fit for purpose. Much of it still relies on centuries-old copper wires, and it's holding us back. Because in the data age, broadband is one of those things your tenants cannot live without.

OUR COMMITMENT TO FIBRE BROADBAND

- We're investing £4.9 billion in delivering the UK's most advanced fibre network
- Our rollout is on track to reach 8 million homes by 2025
- Through our broadband providers, your tenants can enjoy broadband that's up to **25x faster** and **5x more reliable***

THE DIFFERENCE EXPLAINED

The diagram below explains why most broadband is slower than it should be, and why it's prone to faults. We're building an intelligent network for the data age, using the latest technology which will offer your tenants a connection that's ultrafast and reliable all of the time. It also uses less energy compared to copper networks.

WHAT'S IN IT FOR LANDLORDS?

Ultrafast, reliable broadband, connected through a network that's built to last for generations, will help you stay ahead in the increasingly competitive property market.

Once installed in your buildings, you'll never have to think about upgrading again

- Add value to your properties, with a brand new, fibre broadband network
- Attract and retain long-term tenants, offering them a choice of broadband providers
- Enable smart monitoring tech to manage your properties more efficiently

75%

of people would not move to a home with poor connectivity

WE'RE WITH YOU ALL THE WAY

We know you're busy, so we'll make it as easy as possible as possible during planning and keep disruption to a minimum during installation.

You'll get:

- 1 A dedicated Wayleave Account Manager to help you
- 2 Flexible install options so you can choose the most suitable
- 3 Smooth and professional installation

GAME CHANGING BROADBAND FOR YOUR TENNANTS

- Your tenants will experience next-level broadband speeds and reliability. Up to **25x faster** and **5x more reliable***
- Minimal disruption for tenants as we work with you to get your properties connected to our brand new network
- Choice of over 30 broadband providers including...

88%

say slow broadband is a major deterrent to purchasing or renting a property

For more information about a free CityFibre installation, visit cityfibre.com/property

GETTING CONNECTED IS FREE AND EASY

- 1 Give permission**
We'll ask you to sign a wayleave agreement. This gives consent to install the brand new network in your property
- 2 Free survey**
Our free survey allows us to work with you to develop the best installation plan for your properties
- 3 Free installation**
Once we've agreed a non-intrusive plan, we'll install a brand new full fibre network to your properties completely free of charge
- 4 Connected**
Once the network is installed and the services are live, your tenants can connect to ultrafast, reliable broadband from a range of trusted providers
